

Update!

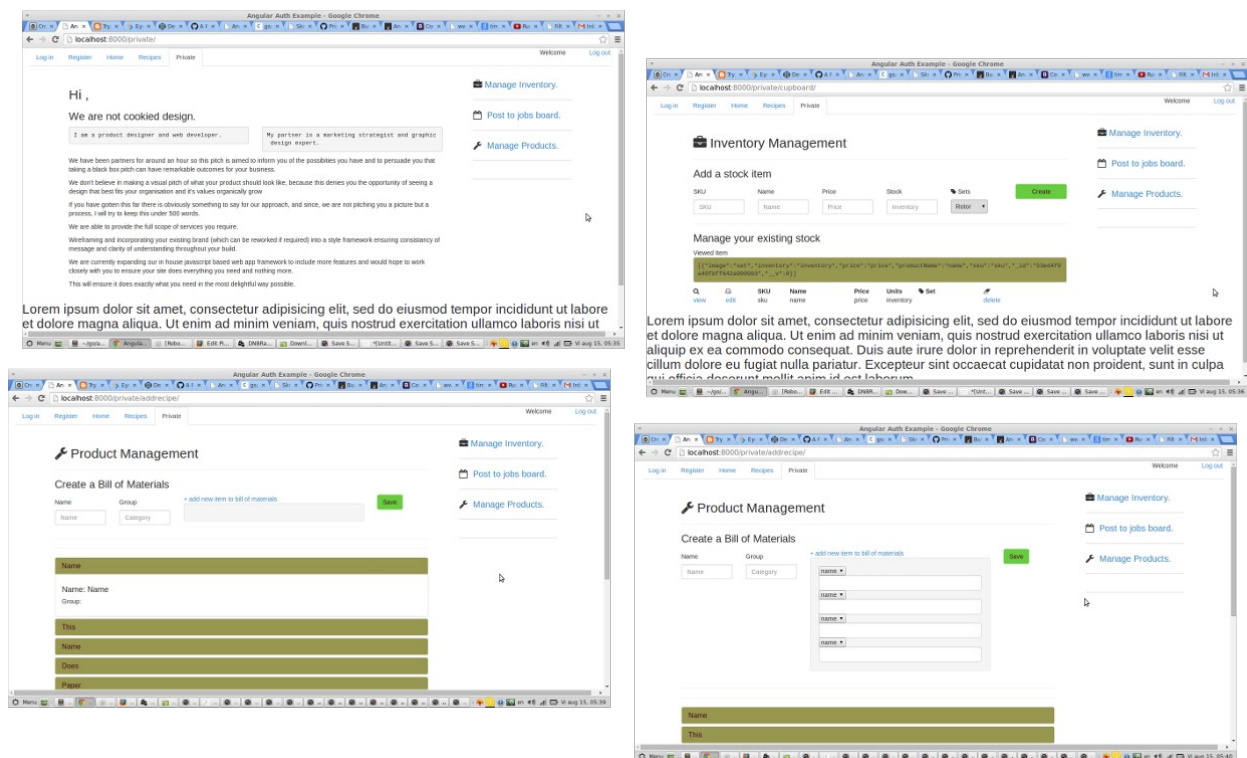

We built a prototype. :))

you can checkout the code here->

<https://github.com/eshopr/workshop/tree/recipe-controller>

It's build with extensibility in mind, and designed to hopefully encourage the same culture of operator repair, often found in more traditional factory components.

Even better. Check out the live Demo <http://notcookedfactory-21590.onmodulus.net/>

hello, We are not cooked design.

I'm Andrew MacKay: a product designer and web developer.

My partner Cosmin Viorel: is a marketing strategist and graphic design expert.

We have been partners for around 36 hours and this is the first opportunity that jumped out us.

We don't believe in making a visual pitch of what your product should look like, because this denies you the opportunity of seeing a design that best fits your organisation and its values, grow organically from our iterative design process.

We do believe you should have a chance to try out some of the moving parts which will hopefully give you a sense of how a product could come together.

We are able to provide the full scope of services you require.

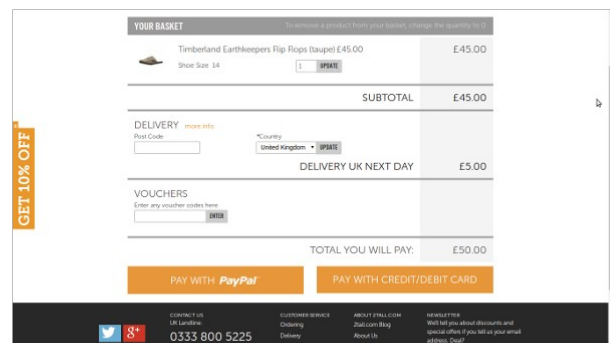

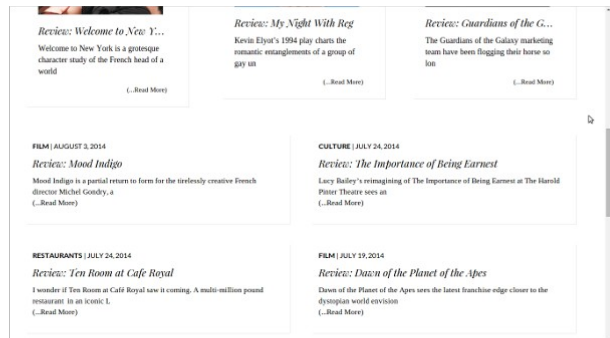

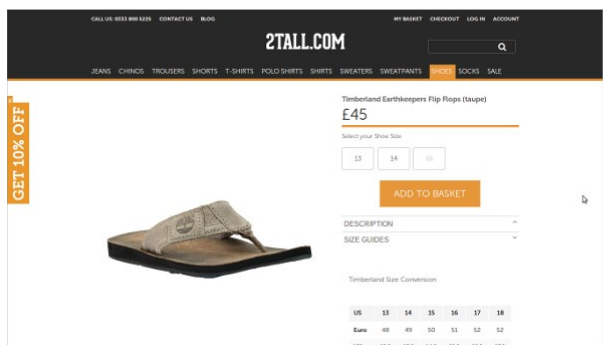

Wire framing and incorporating your existing brand (which can be reworked if required) into a style framework ensuring consistency of message and clarity of understanding throughout your build.

We are currently expanding our in house javascript based ORM framework to include more features and would hope to work closely with you to ensure your site does everything you need and nothing more.

This will ensure it does exactly what you need in the most delightful way possible.

You can find me mostly abandoning prototypes at <https://github.com/binarygeometry> and fixing bugs at 2tall.com . I started to play with CodePen yesterday on Cosmin's recommendation <http://codepen.io/eshopr/pen/rIzBb>

Andrew MacKay: [binarygeometry@gmail.com](mailto:binarygeometry@gmail.com)

Cosmin is very active on [freelancer.com](https://freelancer.com), and you can find a really neat interactive graphic of his work at <http://prezi.com/yixm8lqwual/cosmin-viorel-portfolio/>
